

## Prime Turbines – Director of Operations

In March, Criss Berry joined the Prime Turbines team as Director of Operations reporting to John Waldrop, VP of Sales and Service. Working closely with John, Criss is immersed in learning the operations and roles of each Prime facility.

Criss most recently presided over all Engine Services (Rolls-Royce Spey and Tay series) for Bizjet International in Tulsa Oklahoma, leading that team to record revenues, volume and customer satisfaction results. This diverse team provided engine services including full MRO, Field Services, full-service FBO and heavy-engine (CF680, PW4000, V2500 & CFM56) dismantling services.

His aviation career started as an engine technician with Aviall (Dallas, TX) in 1984. After fourteen years of technical/field services and customer business management, he joined American Airlines in 1998 and headed up Rolls-Royce Tay 650-15, RB211-535E4 and Trent 892 customer business. Beginning in 2005, Criss developed, owned and operated AeroEngine Specialist which provided engine technical and business management services for operators of Gulfstream corporate aircraft.

His education includes Embry Riddle University and has an Airframe and Powerplant license from Texas Aero Tech, Dallas Texas. Criss has served as President and VP with the Professional Aviation Maintenance Association “PAMA” Dallas Chapter and is a member of NBAA’s Maintenance Managers Committee.
