

Machinist – Prime Turbines

Job Description

Prime Turbines, located in Carrollton, Texas a leading independent turboprop engine repair, maintenance, and overhaul company specializing today in the Pratt & Whitney Canada PT6A & PT6T, Honeywell T53, Bell Drivetrain, and GE M601 & H series engines. Has a position open for a machinist specializing Mastercam Software.

Job Requirements:

- 1). Must be able to set up, operate and program CNC mill and lathe using Mastercam software as well as set up and operate manual lathe and mill.
- 2). Must be willing to perform minor benchwork operations such as blending of parts, removing and replacing bushings and threaded inserts, etc.
- 3). Must be able to read and interpret mechanical blueprints.
- 4). Must be able to use precision measuring equipment normally found in a machine shop environment.
- 5). Must be able to read and interpret technical manuals, written instructions, etc.
- 6). Must be able to read, write and speak English on a high school level.
- 7). Must be willing to assist other shop personnel as the work load dictates.
- 8). Must be able to pass a preemployment drug screen.

Physical requirements are those normally associated with working in a shop environment.
