PT6A HOT SECTION INSPECTION

Craftsmanship / Value / Customer Service

PT6A HOT SECTION INSPECTION (HSI)

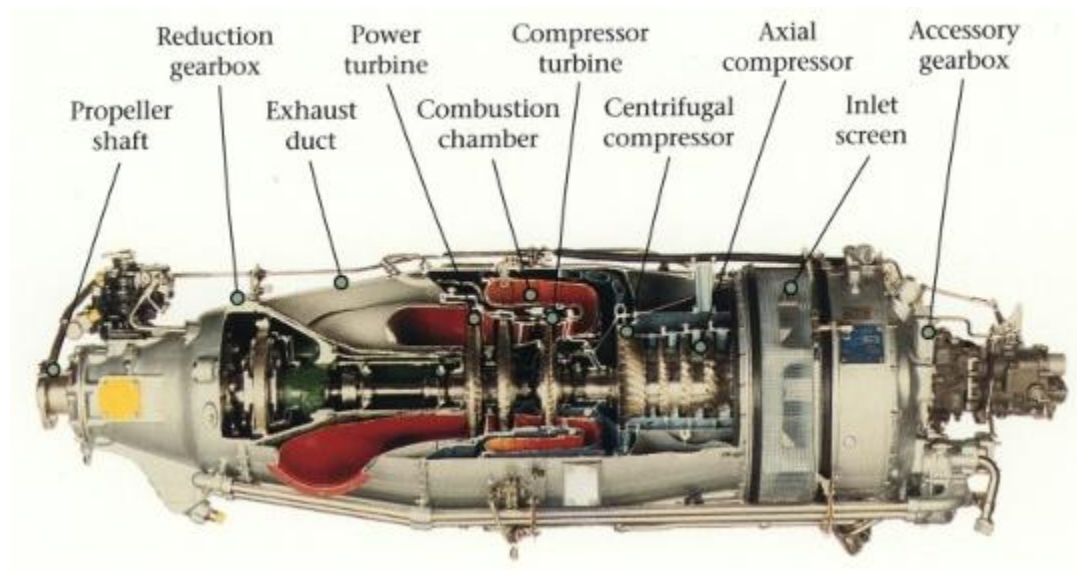

ORIGINATOR OF THE GUARANTEED ZERO GRIND

The Prime Turbines Difference

Prime Turbines pre-grinds compressor turbine tip clearances to your exact specifications, resulting in zero grind, on-wing for no extra charge. All of our facilities have the equipment to duplicate your precise engine environment, enabling us to grind to stringent tolerances. Wet grinding in our shop improves component concentricity and surface finish, a difference reflected in superior engine performance.

Hot Section Services include:

- Small Duct Assembly Recertification
- Component Repair / Overhaul
- CT Disc True and Balance
- CT Disc Re-Blade
- CT Blade Stretch and F.P.I.
- Authorized MORE Service Center and Parts Facility

Contact us today to experience the Prime Turbines difference.
